# LINCOLNSHIRE COUNTY LUNATIC ASYLUM.

---

## *TENTH ANNUAL REPORT* OF THE COMMITTEE OF VISITORS.

---

1862.

---

THE Visitors of this County Asylum have to report to the Courts of Quarter Sessions, that the average weekly rate for maintenance of Patients has been lower in the past year than in any year since the Asylum was opened, viz., 8s. 3 $\frac{1}{4}$ d.

The Visitors in their last Report expressed apprehension that the rapidly increasing number of Patients would necessitate a further enlargement of the Asylum. They regret to find that that apprehension was but too well founded.

It will be remembered that the Asylum was built, in 1852, for 250 patients ; was enlarged in 1858 to accommodate 400 ; and in 1860 was stretched to receive 450 beds, by converting two of the Wards into Dormitories—an arrangement not strictly consistent with sanitary requirements. Since that last extension every bed in the house has been filled, the maximum number attained being 452, and the Visitors have been under the necessity of removing some of the patients to a distant Asylum (Birmingham), where they still remain at an expense to the County of 40 per cent. increase in the weekly rate of maintenance.

It appears from the returns that there are, at the present time, 762 Pauper Lunatics belonging to the County, of whom upwards of 300 are in the care of their Friends, or harmless in the Workhouse. By an Act of Parliament obtained in the last Session, it is now in the power of the Commissioners in Lunacy, to enforce the removal of any or all of these Patients to the County Asylum, and a proportionate expense to be incurred by the County in finding them accommodation. The Visitors do not wish to undervalue the Lunacy Commission, but the ability of the rate-payers, on whom the burthen of this new theory falls, must be reasonably consulted; and the Visitors cannot disguise from themselves, that the enormous expense resulting to Counties from the present system, must inevitably lead to some change, unless relief be provided from the Consolidated Fund.

Under the circumstances before stated, the necessity has been forced upon the Visitors of again enlarging this Asylum; and the subject having been duly submitted to the several Courts of Quarter Sessions, they have, reluctantly, authorised the necessary expenditure. Plans have accordingly been prepared, with much care and consideration on all points, for extending the accommodation to 540 Patients, by means of two advancing wings, one on either side, for male and female Patients respectively. On submitting these plans for the approval of the Secretary of State they were met with the following objection from the Commissioners in Lunacy, viz.:—"As the Commissioners

“would consider an addition to the land belonging to  
 “the Asylum an essential part of any scheme for its  
 “enlargement, they desire me to say that, before re-  
 “commending any plans for the approval of the Secre-  
 “tary of State, they would wish to know what are the  
 “intentions of the Visitors with regard to the purchase  
 “of such land.” This objection will form the subject  
 of discussion at a meeting of the Visitors specially  
 convened for the 30th April instant.

It is to be observed that the area of the Asylum  
 property comprises 45 acres of land, of which nearly  
 15 are, or will be, occupied by the Buildings, airing  
 Courts, Cemetery, and Plantation; the remaining 30  
 acres being cultivated, about one-third as Kitchen-  
 Garden, and the rest in the production of Farm Crops.  
 The latter portion is not cultivated by the spade, but  
 with ploughs and horses in the usual way of farming.  
 The average number of male patients capable of work-  
 ing on the land is 50. It is expected that by chang-  
 ing the system from the plough to the spade as the  
 number of patients increases, ample employment may  
 still be found for them to meet the views of the Com-  
 missioners, especially as no facility at present exists  
 for renting or purchasing more land.

*(Signed),*

G. K. JARVIS, Chairman.

M. P. MOORE, Clerk to the Visitors.

*Sleaford, February, 1863.*

# ANNUAL REPORT

## OF THE

### MEDICAL SUPERINTENDENT.

---

THE Medical Superintendent has the honour to submit to the Committee of Visitors his Tenth Annual Report ; to which is appended the usual Statistics, and a comprehensive Tabular Statement of the results of treatment as affecting each year's admission during the whole period that the Asylum has been in operation.

Tenth Report.

On the 1st of January, 1862, there were in the Asylum 198 men and 219 women—total 417. In the course of the year 77 men and 56 women were admitted ; and during the same period 43 men and 51 women were discharged, of whom 17 men and 36 women were recovered, and 24 men and 14 women died ; thus making the total of discharges and deaths 132, and leaving in the Asylum at the end of the year 418 patients, 208 of whom were men and 210 women.

Admissions,  
Discharges, and  
Deaths.

Tables I. II. and  
III.

The mean daily resident number of men was 210, and of women 222—in all 432.

Resident  
Numbers.

The largest number in the Asylum at any one time was 452.

The recoveries calculated on the number of admissions was 39.84 per cent., being 22.07 on the men's side, and 64.28 on that of the women.

Percentage of  
Recoveries.

Mean mortality.

The mean annual mortality was 11.4 per cent. amongst the men, and 6.3 per cent. amongst the women, giving the favourable general rate of 8.8 per cent. of both sexes.

Sanitary  
Condition.

With the exception of a loathsome skin disease, introduced on the person of a male patient, no malady of the contagious or zymotic class occurred, and the patients generally maintained the good bodily health and condition, which it has happily been the Superintendent's duty to record in all his previous Reports.

Inquest

One inquest was held in the case of a female epileptic patient, who was found dead shortly after going to bed, with every appearance of having expired with extreme suddenness from direct paralysis of the heart. The Coroner expressed his satisfaction with the evidence adduced, and the Jury found a verdict that the death of the deceased was from natural causes.

Causes of Death.  
Table.

Beyond this there was nothing in the mortality which requires special notice. The causes of death were as follows, viz.:—General Paralysis, 8 ; Paralysis, 3 ; Epilepsy, 3 ; Chronic Brain Disease, 3 ; Phthisis, 3 ; Gangrene of the Lungs, 1 ; Pneumonia, 4 ; Disease of the Heart, 3 ; Disease of the Liver, 2 ; Ovarian Disease, 1 ; Chronic Abscess, 1 ; and Senile Decay, 6.

One of the male criminal patients effected his escape in the month of July, it is supposed by climbing over one of the walls of the exercising grounds attached to the Wards. He was committed to prison

in the early part of the year for a misdemeanour, and while undergoing his sentence found to be insane. According to his own account he had been in gaol a great many times in various parts of the country ; and from his great cunning and familiarity with the slang and implements of thieves, was no doubt an old and expert offender. Information of his escape was immediately given to the police, but up to the present time no tidings of him have been received. A female patient, also, who was convalescent and on the eve of being discharged, escaped from the Laundry, where she was unsuspectingly allowed to occupy herself. No information respecting her could be obtained during the fortnight permitted by the Act for recapture, but on the very day that this time elapsed she returned to her husband, and has since continued well, or at least sufficiently so to remain at home. She had been in the Asylum before when a patient escaped, and had then, no doubt, become acquainted with the clause relating to recapture.

Escapes.

The average daily resident number increased during the year from 405 to 432, and for some days every available bed in the wards was occupied. It fortunately happened that no case was presented for admission just at that time, so that the necessity of sending any away, although imminent, did not actually arise. The removal of ten male patients belonging to other counties, and sending 12 men and 12 women to the Birmingham Asylum under a minute of the General Meeting of Visitors in October,

Crowded State of  
the Asylum.

brought considerable relief, which it was hoped would continue until the enlargement of the Asylum was effected. The numbers, however, since then have been steadily increasing, and it will be necessary very shortly either to transfer more patients to some other Asylum, or to restrict the admissions to urgent cases only—a course which would be attended with many evils.

Lunacy Amend-  
ment Act.

The 8th section of the Lunacy Amendment Act, which came into operation during the year, empowers the Visitors to make arrangements with Boards of Guardians, subject to the approval of the Commissioners and the Poor Law Board, for the reception into Workhouses of a limited number of chronic Lunatics. The onus of selecting the cases, and certifying them to be fit and proper to be so removed, is correctly enough placed on the Medical Superintendent, who, as a matter of course, before taking upon himself so grave a responsibility, will require to be satisfied by personal observation and enquiry of the adequacy of the proposed arrangements, both in a sanitary and precautionary point of view, and of the efficiency of the attendants to whom the charge of the patients is to be entrusted. When it is remembered that by far the largest number of chronic cases in Asylums are tranquil only in consequence of the skilled care and supervision with which they are surrounded, that they are peculiar in their habits, and by no means free from accessions of mental excitement, it is clear that they are not fit to be mixed with the ordinary inmates, or placed

under the ordinary régime of a Workhouse ; a special provision would be needed for them ; but as this would remove the plea of economy, it is not likely that Boards of Guardians will be desirous of the reception of such cases. Moreover, the power conferred on the Commissioners by the 31st section of the same Act, to order the removal of any lunatic from the Workhouse to the Asylum, evidently tends in the opposite direction ; so that, unless further modifications of the Lunacy law are made, there appears to be no alternative but to continue to provide accommodation in the County Asylums until the pressure ceases.

The old absorbing tank in the adjoining field having failed to carry off the sewage from the Asylum—the liquid having overflowed and formed in effect a large open cesspool on the surface of the ground—has become a great nuisance to the neighbourhood, and endangers the health of the Asylum. The Superintendent, acting under the instructions of the Visitors, who had the subject under their consideration, took great pains to ascertain what is being done with sewage in the County Asylums and other large Institutions in different parts of the country, and also to make himself acquainted with the views of practical men on the subject. He also visited the Wellington College, and inspected the sewage-works successfully carried out there on the plan of the late Prince Consort, by Mr. Menzies, deputy Surveyor of Woods and Forests. The results of these enquiries were embodied in a special report to the Visitors.

Sewage.

Mr. Menzies subsequently visited the Asylum, and submitted an interesting and almost exhaustive Report, pointing out the measures required to meet the difficulty ; and supplied detailed plans and specifications of the filtering tank, which forms the basis of his method. These having been approved at the last Quarterly Meeting, the sluice-cocks and valves have been obtained, and the work can now be proceeded with at any time. The only objectionable circumstance now left in connection with the sewage is that the limited extent of the estate in the direction of the main drain prevents the placing of the filtering tank so far off from the building as is desirable.

Occupation and  
Amusement.

The amusement and employment of the patients have been steadily persevered in, and their comfortable appearance and general tranquillity have been remarked by the Commissioners and visitors who, from time to time, have been shown over the Institution. Although the number of infirm and incapable patients is increasingly large, an additional quantity of land was brought under cultivation as kitchen-garden.

Officers and Ser-  
vants.

A few changes took place amongst the Attendants and Servants, who, as a body, acquitted themselves of their often most trying duties in a very satisfactory manner. The services of the several Officers also continued to merit approval.

The Annual Abstract of the Accounts of the Steward and Clerk of the Asylum is as usual appended, and illustrates the carefulness and economy

exercised in his department. The average weekly rate for the year was 8s.  $3\frac{1}{4}$ d.

Weekly-rate.

The Superintendent has again the pleasing duty of sincerely thanking the Committee for the continued support and counsel with which they have favoured him in the administrative duties of his office,

Conclusion.

And of subscribing himself,

Their most obedient and humble Servant,

EDWD. PALMER.

## OBITUARY.

No. in Register.	Age at Death and Civil State.	Sex	Form of Mental Disorder and Bodily Condition when admitted.	Length of time Insane before Admission.	Duration of Residence in the Asylum.	Apparent Cause of Death.
592	27 years—single	M.	Congenital Imbecility. In good general health.	From birth	4 years, 11 days	Pulmonary consumption.
1059	30 years—married	M.	Acute mania, with general paralysis.	2 years	183 days	General paralysis. Convulsions and coma.
1107	71 years—married	M.	Senile dementia. Generally infirm.	Unknown	30 days	Senile decay.
660	65 years—married	M.	Melancholia. Infirm.	10 years	3 years, 293 days	Gangrene of the Lungs.
218	32 years—single	F.	Epileptic mania. Weakly. Paralyzed.	2 months	9 years, 5 days	Epilepsy, paralysis, coma.
338	83 years—married	M.	Chronic mania. Good general health.	Unknown	7 years, 324 days	Pneumonia.
1125	63 years—married	F.	Dementia. Very thin and infirm.	6 months	17 days	Broneho-pneumonia.
968	72 years—married	F.	Senile dementia. Infirm.	1 year	86 days	Senile decay.
1028	72 years—married	F.	Senile dementia. Very infirm.	1 year	320 days	Senile decay.
849	39 years—married	M.	Acute mania, with typhoid symptoms.	2 weeks	3 years, 94 days	General paralysis. Convulsions and coma.
1065	36 years—widowed	F.	Mania. Thin. Fair general health.	2 months	253 days	Ovarian tumor. Gangrene.
995	18 years—single	M.	Mania. Very thin and exhausted.	3 weeks	1 year, 46 days	Pulmonary consumption.
1047	78 years—married	M.	Suicidal melancholia. Infirm. Paralyzed.	2 months	308 days	Senile decay.
1159	64 years—widowed	F.	Dementia. Very thin and infirm.	3 years	44 days	Senile decay.
94	50 years—single	F.	Epileptic dementia with paralysis.	many years	9 years, 227 days	Epilepsy. Coma.
196	59 years—married	M.	Suicidal melancholia. Thin and feeble.	4 months	9 years, 169 days	Hepatic disease. Hydrothorax.
1010	26 years—single	M.	Dementia. Helpless from general paralysis.	18 months	1 year, 36 days	General paralysis. Asthenia.
940	47 years—married	F.	Mania. Thin and feeble.	11 weeks	1 year, 250 days	Disease of the heart.
123	36 years—married	M.	Chronic mania. Good general health.	many years	9 years, 236 days	Disease of the heart.
903	77 years—widowed	F.	Epileptic mania. Slight. Weakly.	3 years	107 days	Broneho-pneumonia.
585	62 years—married	M.	Mania. Stout. Very feeble and infirm.	7 weeks	1 year, 5 days	Diseased heart. Emphysema.
1164	42 years—married	M.	Dementia. Helpless from general paralysis.	2 months	4 years, 216 days	Paralysis. Convulsions and coma.
1162	33 years—married	F.	Mania. Slight. Good general health.	6 months	36 days	General paralysis. Asthenia.
209	47 years—single	M.	Congenital imbecility. Thin and weakly.	From birth	73 days	Diseased brain. Convulsions and coma.
556	39 years—married	M.	Mania. Stout. Good general health.	11 months	9 years, 226 days	Hepatic disease.
1206	32 years—single	M.	Mania. Thin. Extremely exhausted.	2 weeks	6 days	Pneumonia.
987	30 years—married	M.	Epileptic mania, with typhoid exhaustion.	4 months	11 days	Chronic brain disease.
1137	60 years—widowed	F.	Melancholia. Thin. Paralyzed.	1 month	1 year, 196 days	Epilepsy.
1141	45 years—married	M.	Dementia. Helpless from general paralysis.	4 years	181 days	Paralysis. Coma.
1199	30 years—married	M.	Mania. Extremely exhausted.	1 week	174 days	General paralysis. Asthenia.
1203	36 years—married	M.	Mania. Much enfeebled by general paralysis.	1 month	57 days	Exhaustion from chronic abscess.
1222	49 years—married	F.	Mania. Helpless from paralysis.	4 months	62 days	General paralysis. Convulsions and coma.
749	55 years—married	F.	Mania. In fair general health.	15 years	18 days	Paralysis. Convulsions and coma.
1127	46 years—married	M.	Mania. Much enfeebled by general paralysis.	Unknown	244 days	Pulmonary consumption.
975	66 years—single	F.	Senile Dementia. Very infirm and helpless.	12 years	279 days	General paralysis. Asthenia.
1190	40 years—married	M.	Dementia. Helpless from general paralysis.	5 months	316 days	Chronic brain disease. Convulsions and coma.
38	76 years—married	M.	Melancholia. Thin and generally infirm.	Many years	149 days	General paralysis. Convulsions and coma.
					10 years, 107 days	Senile decay.
